Ordinary income	40,000	--	70,000	(18.8%)
Net income	30,000	--	40,000	(6.9%)
Net income per share	9.97 yen		13.29 yen	

* Indicates percentage of change from the corresponding period of the previous fiscal year.

Revision to nonconsolidated forecast in 1Q: Yes

Qualitative Information, Financial Statements and Other Items**1. Qualitative Information on Consolidated Operating Results**

Japan's economy continues to slow down as corporate profits, which had previously remained high, worsened due to escalating raw material prices. In overseas markets, the U.S. economy continues to be sluggish and the EU economy is slowing moderately, while China and other emerging countries are sustaining high growth as a whole. However, the high cost of raw materials may exert a further negative impact on the world economy.

In this economic environment, the Kobe Steel Group's consolidated sales in the first quarter (April-June) of fiscal 2008, ended June 30, 2008, increased 65.2 billion yen to 543.0 billion yen, in comparison to the same period last year, mainly owing to continued firm demand in the Iron & Steel and Construction Machinery segments. Operating income went up 5.1 billion yen to 45.2 billion yen, in comparison to the same period last year. In addition to further cost reductions and higher sales prices of products, profits were supported by a gain on inventory valuation from the increase in raw material prices. Ordinary income went up 5.0 billion yen to 42.6 billion yen, in comparison to the same period last year. Net income for the quarter increased 2.2 billion yen to 25.2 billion yen, in comparison to the same period last year.

Iron & Steel

The supply and demand situation for steel products is tight as a whole. Both domestic and overseas demand from the automotive, shipbuilding and other manufacturing industries continue to be strong. On the other hand, iron ore and coal prices increased sharply in comparison to the previous year, and market conditions for metals and ocean freight continue to remain high.

Brisk demand continues for steel castings and forgings mainly from the shipbuilding industry. Demand also remains high for titanium mill products and welding consumables.

Under these conditions, Kobe Steel is continuing a high level of operation to fulfill its responsibility in supplying its customers. As well, the company is channeling its efforts into reducing costs and increasing sales prices in the face of high raw material prices.

Wholesale Power Supply

The Wholesale Power Supply segment is operating as planned. Kobe Steel is making full efforts to maintain stable operation of the power plant to ensure projected profits.

Aluminum & Copper

In aluminum rolled products, demand for aluminum can stock continues to be firm. Demand for

However the semiconductor market continues to undergo an adjustment phase. As a result, recovery in demand for copper sheet and strip for electronic materials has been delayed.

Machinery

On the back of high crude oil prices, capital investments in the oil refining, petrochemical and energy fields are active worldwide. Thus, orders for compressors and energy-related equipment are strong. In addition, due to the tight market for iron units, inquiries are increasing for direct reduction plants. Sales in the current fiscal year, for the most part, are progressing as planned. However, some orders incurred cost increases due to the higher cost of materials and components.

Construction Machinery

Demand for hydraulic excavators is strong in China, Southeast Asia, the Middle East and Russia. However, demand is going down in Japan. Demand for cranes continues to remain strong worldwide. The rising cost of materials and components is a concern, and the Construction Machinery segment plans to increase sales prices.

Real Estate

Business conditions for real estate sales continue to be severe. However, profits in real estate leasing are steady. As a result, the Real Estate segment as a whole is performing as planned.

Electronic Materials & Other Businesses

Target material for thin-film wiring faced competition from alternative materials, but the testing and analysis business, centered on the transport and electronics industries, is performing well.

2. Qualitative Information on Consolidated Financial Position

While accounts receivable decreased, inventories and investments in securities increased. As a result, total assets at the end of the first quarter of fiscal 2008 increased 17.1 billion yen to 2,346.1 billion yen, in comparison to the end of fiscal 2007, ended March 2008. Foreign currency translation adjustments went down, but a rise in retained earnings and higher net unrealized holding gains on securities led to an increase of 19.4 billion yen in net assets to 667.2 billion yen, in comparison to the end of fiscal 2007. As a result, the net worth ratio at the end of the first quarter of fiscal 2008, ended June 2008, was 26.4%, an increase of 0.6% in comparison to the end of fiscal 2007.

In the first quarter of fiscal 2008, interest-bearing debt decreased 35.4 billion yen to 787.9 billion yen, in comparison to the end of fiscal 2007.

3. Qualitative Information on Consolidated Forecast

In the Iron & Steel segment, Kobe Steel intends to further reduce costs and increase sales prices to deal with rising raw material costs. In the Machinery segment and the Construction Machinery segment, however, profits are anticipated to decrease due to the high cost of materials and components. Under these conditions, Kobe Steel has revised its consolidated forecast from the previous forecast made on April 25, 2008.
